Harsha M

Software Engineer | React | TypeScript | Full Stack Development

harsham0402@gmail.com | linkedin.com/in/harshavardhini-web | Chennai, India

PROFESSIONAL SUMMARY

Software Engineer with **2+ years of professional experience** building and maintaining enterprise web applications across frontend, backend, APIs, databases, testing, and cloud environments. Experienced with **JavaScript, TypeScript, React, Vue.js, Laravel, PHP, MySQL, PostgreSQL, REST APIs, AWS, Git, and automated testing**. Strong experience translating business requirements into reusable UI components, scalable backend services, data-driven workflows, and production-ready features. Currently focused on **React, TypeScript, modern state management, Node.js, frontend architecture, UI engineering, and digital product development**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, SQL,

Frontend: React.js, TypeScript, Vue.js, HTML5, CSS3, Vite, Redux Toolkit, TanStack Query, React Hook Form, Zod, AJAX, Responsive UI

Backend: Node.js, Express.js, Laravel, PHP, RESTful APIs, SOAP APIs, MVC Architecture

Databases: PostgreSQL, MySQL, SQL, Relational Database Design

Cloud: AWS EC2, AWS S3, AWS RDS, Cloud Deployment

Testing: Vitest, Cypress, Laravel Dusk, PHPUnit, Unit Testing, End-to-End Testing

DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Postman, Composer, npm

Architecture: Component-Based Architecture, Modular Architecture, REST API Design, Authentication, Authorization, RBAC

Design & UI: Figma, UI/UX Principles, Responsive Design, Design Systems, Prototyping, GSAP

Practices: Agile, Scrum, SDLC, Peer Code Review, Debugging, CI/CD

PROFESSIONAL EXPERIENCE

T Cube The Think Tank Solutions Aug 2024 – Present

Software Developer Chennai, Tamil Nadu

- Developed and enhanced scalable enterprise web applications using **Laravel, PHP, JavaScript, Vue.js, MySQL, REST APIs, and AWS** across the software development lifecycle.
- Built reusable frontend components and backend services while translating business requirements into maintainable production features.
- Developed ERP modules covering business workflows, inventory, procurement, project management, stock operations, dashboards, and reporting.
- Designed responsive user interfaces including dashboards, analytic visualizations, Gantt charts, filtering systems, calendar views, and interactive business workflows.
- Developed and integrated **RESTful and SOAP APIs** for frontend-backend communication and external system integration.
- Implemented complex filtering, searching, sorting, relational queries, and data-driven interfaces across enterprise modules.
- Built real-time functionality using **WebSockets** to synchronize task updates across users.
- Implemented authentication, authorization, role-based access control, validation, and business-rule enforcement.
- Wrote and maintained automated UI and end-to-end tests using **Laravel Dusk**, contributing to a **60% reduction in production issues** over two releases.
- Used Git-based development workflows, debugging, peer code reviews, and Agile/Scrum practices to deliver production features.
- Worked with SQL queries, database relationships, migrations, indexing, and backend query optimization for enterprise workflows.
- Applied static analysis and code-quality practices using **PHPStan/Larastan** and automated testing.

PROJECTS

Digital Asset & Product Design Platform – React, TypeScript, Node.js, PostgreSQL, AWS

- Designed and developed a full-stack **digital asset management and product design platform** for managing digital assets, product information, design versions, colorways, materials, and approval workflows.
- Built a **React + TypeScript** application using reusable components and feature-based architecture for scalable frontend development.
- Developed an interactive product customization interface allowing users to modify predefined product design regions and visualize different color combinations in real time.
- Implemented structured product and asset models using **TypeScript** to maintain type safety across application workflows.
- Developed REST APIs using **Node.js and Express.js** for products, digital assets, metadata, users, versions, search, filtering, and approval workflows.
- Designed PostgreSQL schemas and relationships for products, assets, users, design versions, colorways, materials, and approvals.
- Implemented centralized client-side state management using **Redux Toolkit** for design configuration and application state.
- Implemented server-state management, API caching, mutations, loading states, and synchronization using **TanStack Query**.
- Built reusable form workflows using **React Hook Form and Zod** for validation and structured input handling.
- Implemented authentication, authorization, and role-based workflows for designers, reviewers, and administrators.
- Designed asset versioning workflows to maintain historical design iterations and support review and approval processes.
- Designed cloud-storage architecture using **AWS S3** for scalable digital asset storage.
- Designed responsive interfaces in **Figma** and translated product designs into reusable React components.
- Focused on performance, accessibility, responsive behavior, component reuse, API error handling, and maintainable frontend architecture.
- Designed the architecture to support future **AI-assisted asset tagging, visual search, metadata generation, and product design recommendations**.

ERP & Project Management Platform – Laravel, Vue.js, MySQL, AWS, WebSockets

- Developed enterprise ERP functionality across inventory, procurement, stock management, project management, and business operations.
- Built interactive Kanban workflows with task creation, drag-and-drop functionality, story points, and real-time updates.
- Implemented advanced filtering, search, sorting, calendar views, and data-driven dashboards.
- Developed reusable backend services, repositories, validation logic, and database queries for complex business workflows.
- Optimized relational queries and data retrieval for enterprise list and calendar-based interfaces.

CERTIFICATIONS

- **CCNA – Introduction to Networking** — Cisco Certified Network Associate, 2023
- **Introduction to Database and SQL** — Great Learning, 2024
- **Linux-Ubuntu** — Chegg Certification, 2024

EDUCATION

Rathinam Technical Campus, Anna University 2020 – 2024
Bachelor of Engineering — Electronics and Communication Engineering CGPA: 8.45/10.0
